OUR PRODUCT (SODA MACHINE REGULATOR)

- Durable / Repairable
 - Made in India / All parts Available
 - Made From Brass Forged Metal/
- Three Gauges : Inlet 4000PSI/Outlet
One 100 PSI/Second Outlet 200
PSI/Outlet Two One For Syrup &
Another For Soda.

OUR PRODUCT (VARIOUS GAS REGULATORS)

President brand STAINLESS STEEL METAL GAS REGULATOR only one manufacturer in India. Extra high pressure buster regulator or gas hydraulic compressor regulator – approved by m/s Hindustan aeronautics ltd. Nasik

OUR PRODUCT (GAS MANIFOLDS)

Manifolds are used to connect two or more high pressure cylinders together for higher flow rates or for higher storage capacity. The manifolds could be arranged in a single row or in cases where space is a constraint, could be arranged facing each other. In most cases, to ensure zero downtime, at a time only cylinders in one of the rows are used. When gas in this row is depleted, the gas in the other row is used and cylinders in the earlier row are sent for refilling. The manifold system could be made of brass or SS.
